Per U.S. federal law, a dog trained to assist with a person's disability can join them without a fee in public places like taxis, stores, hotels, restaurants, hospitals, and schools. No ID, equipment, or 'certification' is required. Only two questions are allowed: Is the dog a service animal required because of a disability? What work or task has it been trained to perform? It may only be denied if the animal is out of control or not housebroken.
